discover the power of drama and bring imaginations to life.

Become an animator of imaginations. Help others discover their own creative voices. Concordia's Drama in Education programme can give you the environment you need to explore all aspects of educational drama and theatre. Whether you hope to work with adults or children and whether you want to prepare for work in the community, work in institutions or for graduate work in drama therapy, we can help you realize your potential as an artist and educator.

When you study at Concordia you also learn something about the theatre as a whole. You may chose courses in directing, stage management, acting, design and playwrighting.

If you would like to hear more, give us a call.
